Worko

User Guide

Everything you need for a smooth day at the firm — in simple steps, with pictures.

Web · Desktop · Android

Version 2026.11

CONTENTS

What's in this guide

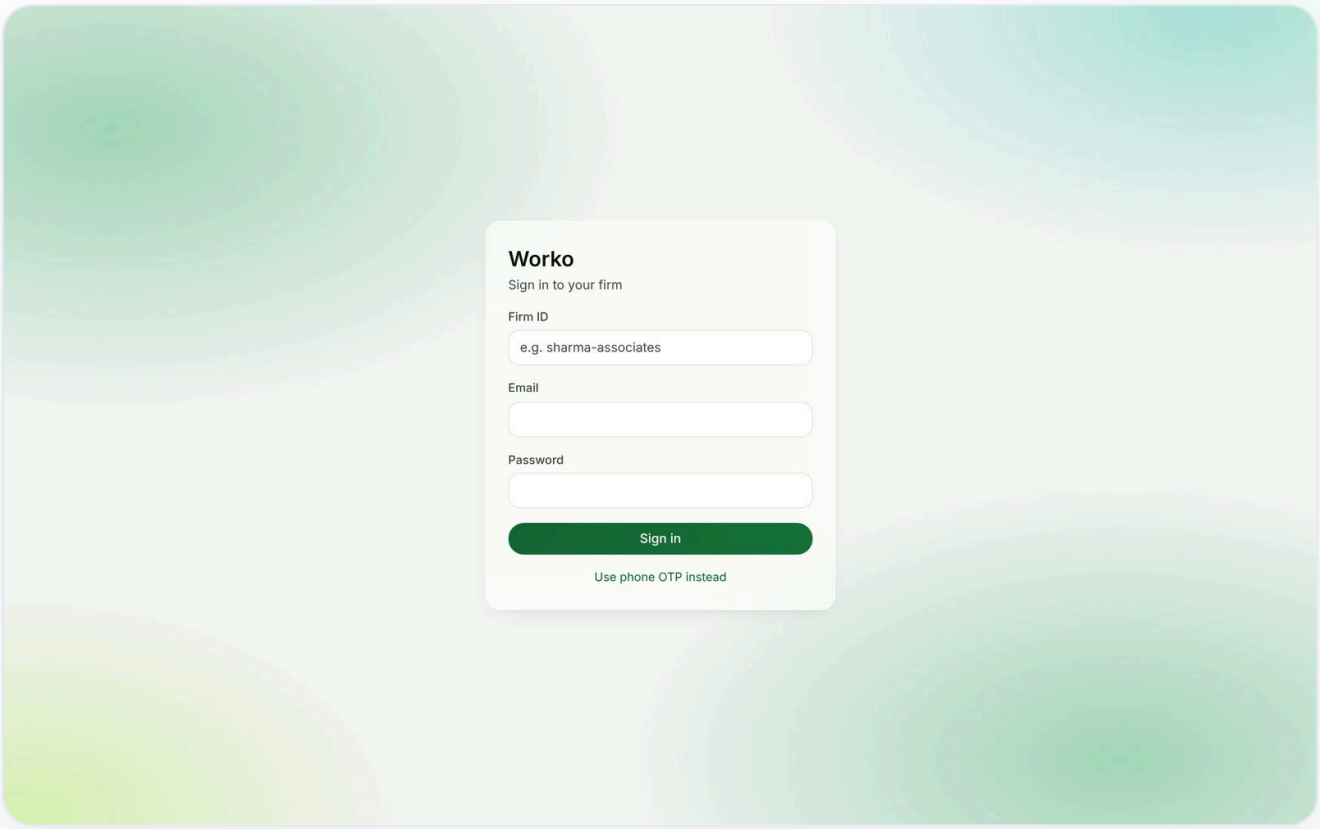

Read pages 3–6 first. They cover 90% of a normal day.

01	Sign in	3
02	Your dashboard	4
03	Add a task in one line	5
04	Finish your day with “My day”	6
05	Find anything fast	7
06	Tasks	8
07	Clients	9
08	Compliance	10
09	Billing	11
10	Time	12
11	Reports	13
12	Team & roles (for admins)	14
13	Make it yours	15
14	On your phone	16
15	Shortcuts & help	17

01 · START

Sign in

Your admin gives you three things: a Firm ID, your email and a password.

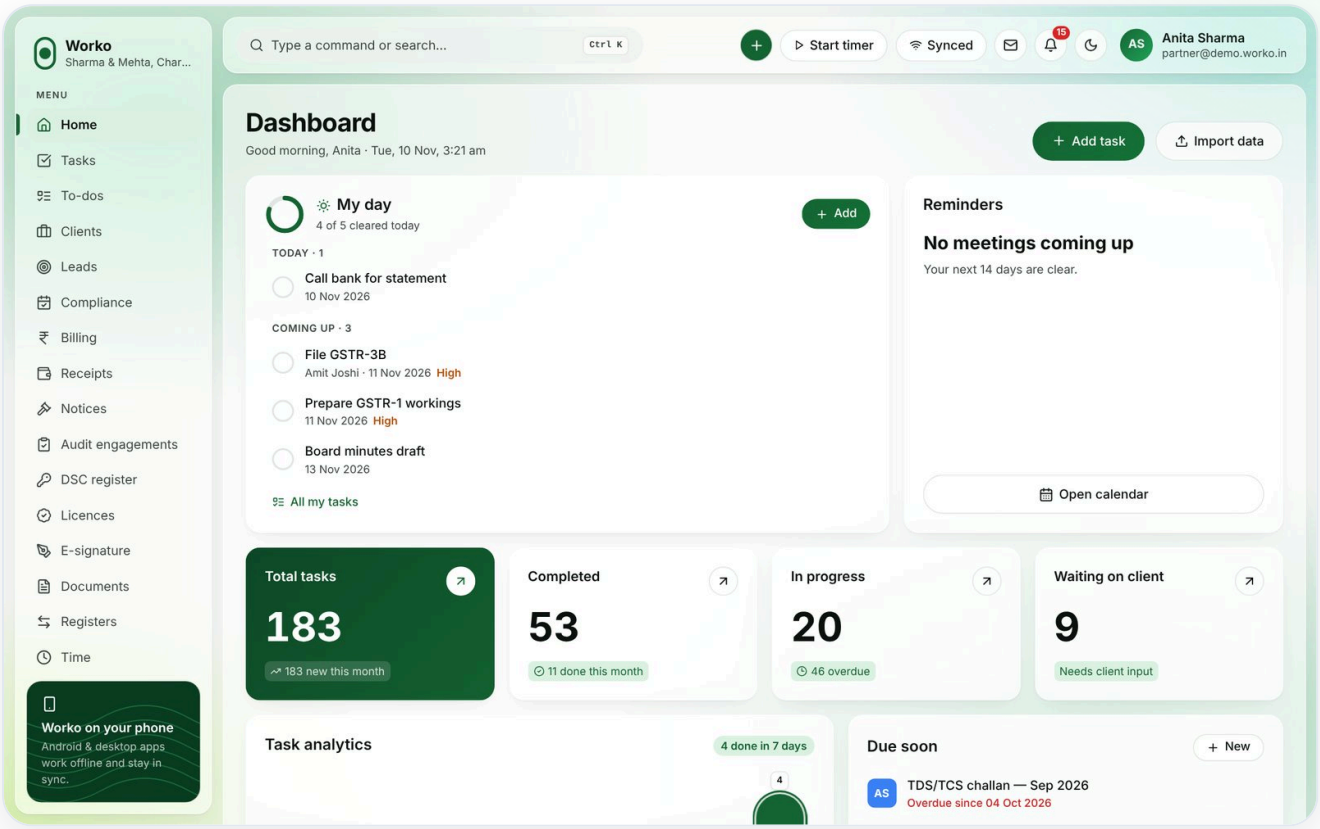

1. Open Worko in your browser, the desktop app or the Android app.
2. Type your **Firm ID** (for example `sharma-associates`).
3. Type your **email** and **password**, then press **Sign in**.
4. If asked, type the 6-digit code from your authenticator app.

> **Tip:** no password? Tap **Use phone OTP instead** to get a code by SMS (if your firm has SMS turned on).

02 · HOME

Your dashboard

One screen tells you what matters today.

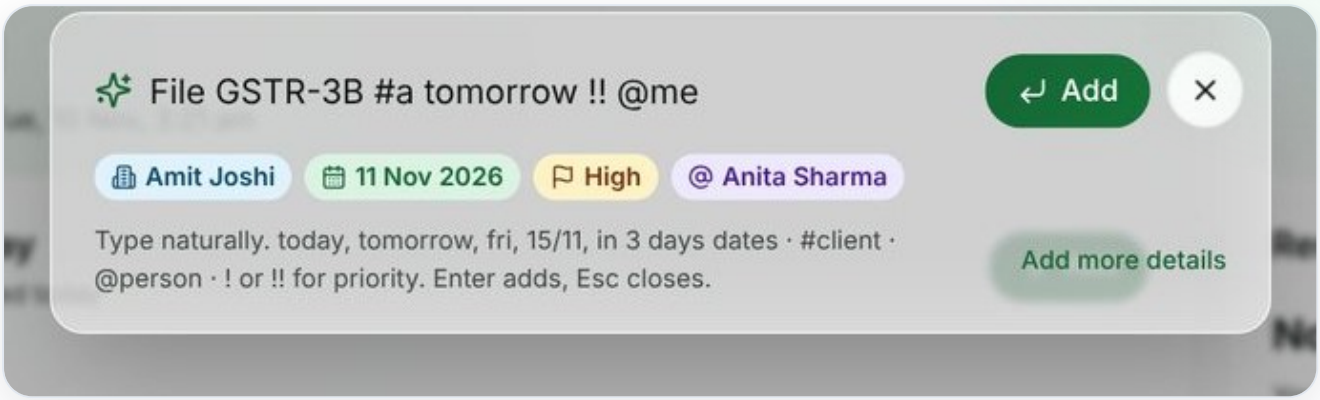

PART	WHAT IT SHOWS
My day	Your overdue, today and coming-week tasks. Tick to finish.
Number cards	Total, completed, in progress, waiting on client. **Tap a card** to see those tasks.
Due soon	The next deadlines across the firm.
Top bar	Search, **+** quick add, timer, sync status, messages, alerts, theme.

Green "Synced" means everything is saved. If it says **Offline**, keep working — Worko saves and sends later.

03 · FASTEST WAY TO WORK

Add a task in one line

No long form. Just type what you'd say out loud.

1. Press **N** on your keyboard, or tap the green **+**.
2. Type, for example: `File GSTR-3B #acme tomorrow !! @ravi`
3. Check the coloured chips, then press **Enter**. Type the next one.

#acme → client · tomorrow → date · !! → high · @ravi → person

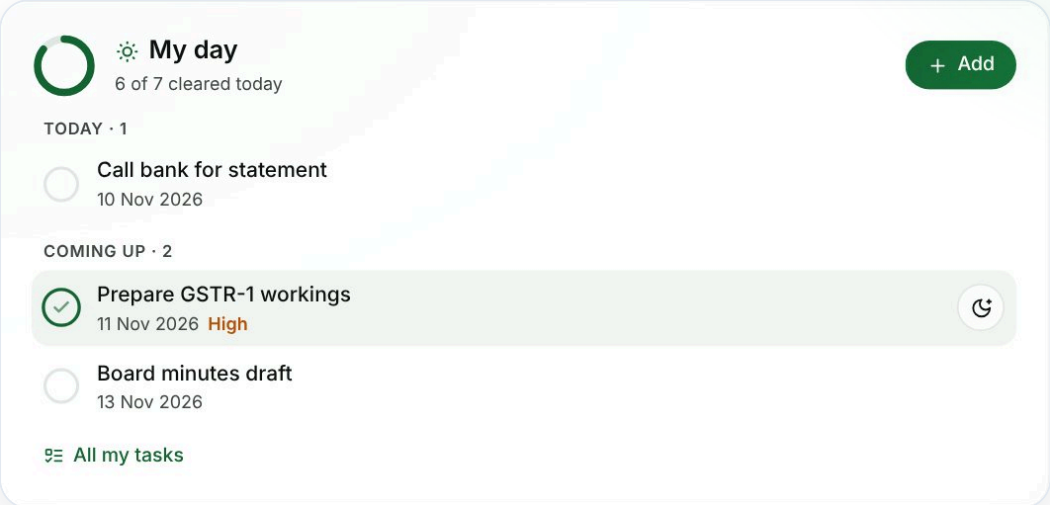

DATES YOU CAN TYPE	PRIORITY	PEOPLE
`today` `tomorrow` `fri` `next week` `in 3 days` `15/11` `20 dec`	`!` high `!!!` urgent	`@name` `@me` (you)

Need more fields? Click **Add more details** for the full form (service, statutory date, reviewer).

04 · FINISH FAST

Finish your day with “My day”

Only your work. One tap to finish.

1. **Tick the circle** when a task is done. It strikes through and slides away.
2. **Tap the moon** to move a task to tomorrow.
3. Made a mistake? Tap **Undo** on the message that pops up.
4. Tap the task name to open all its details.

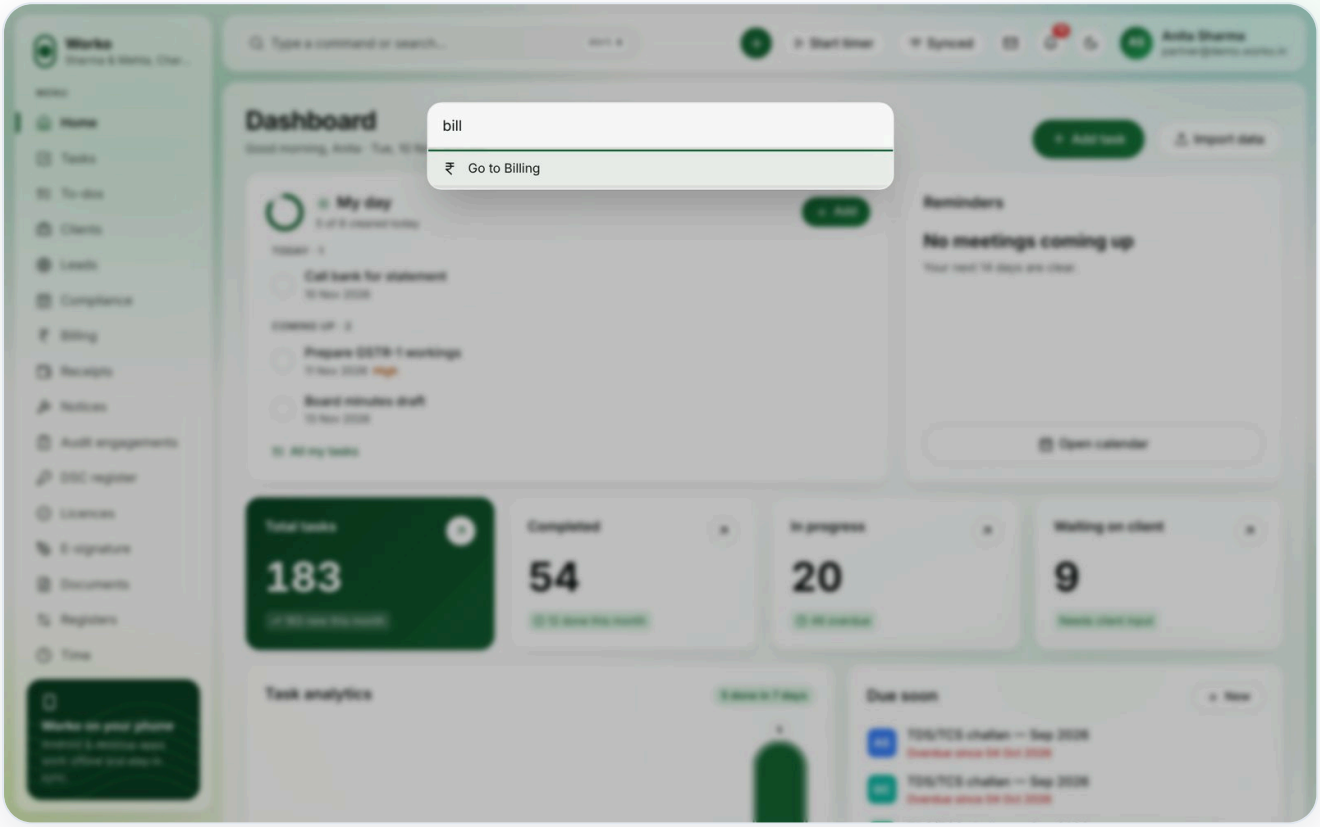

Ring at the top = how much of today you've cleared. Aim for a full circle.

Checklist not finished? Ticking opens the task so you can finish the required checks first.

05 · SEARCH

Find anything fast

One search box opens any client, task, invoice or screen.

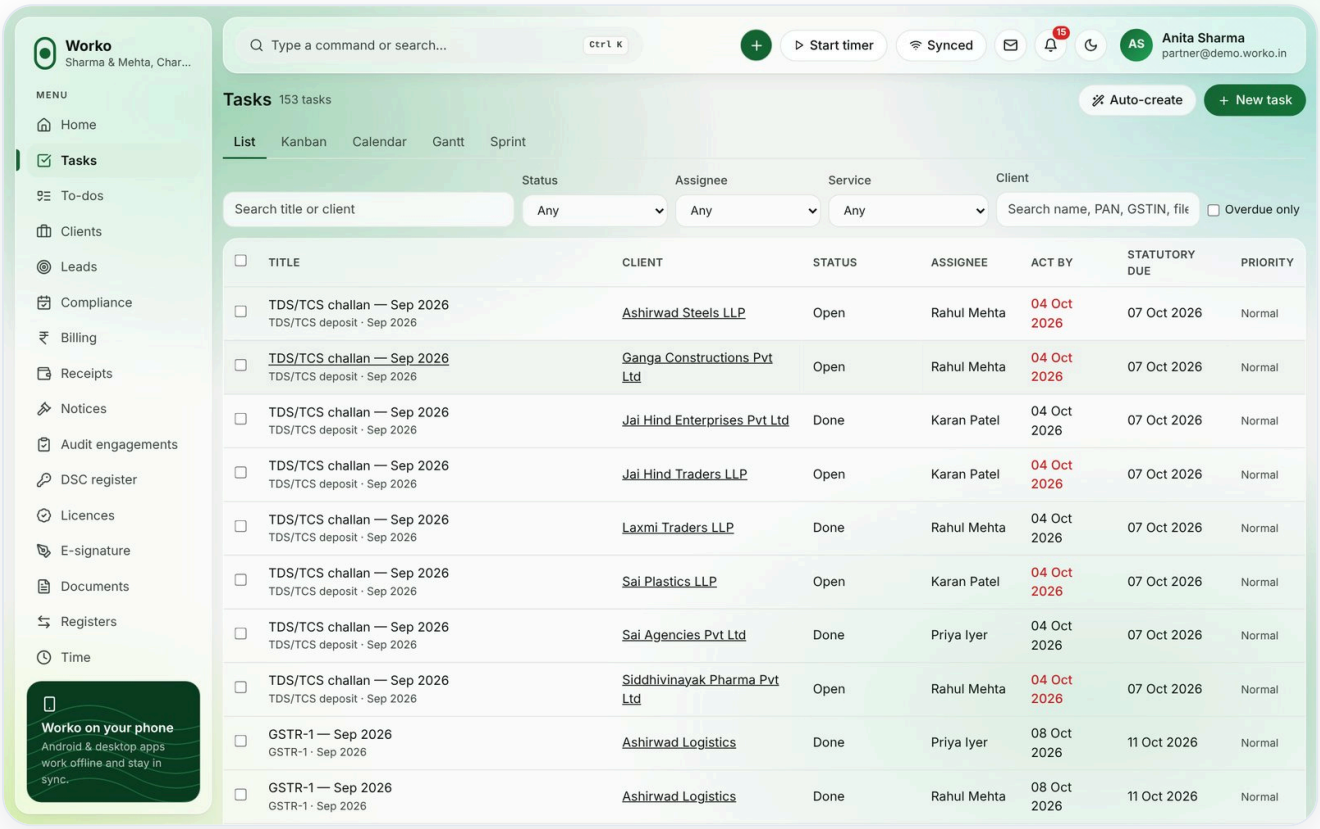

1. Press Ctrl + K (⌘ + K on Mac), or click the search bar.
2. Type a few letters — a client name, PAN, GSTIN, or a screen like “billing”.
3. Use the arrow keys and press Enter.

Jump keys: press G then a letter, e.g. G T for Tasks.

06 · WORK

Tasks

All firm work in one place. Pick the view you like.

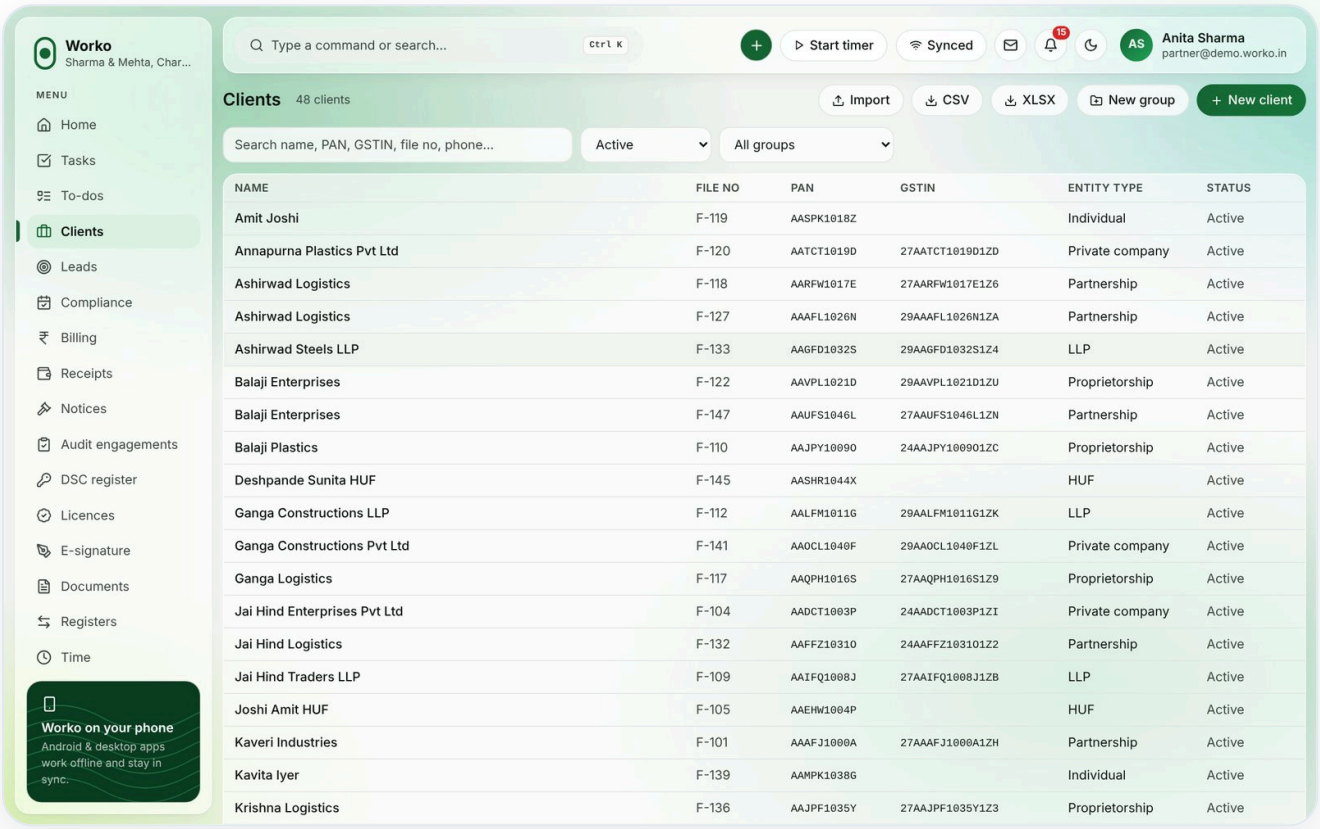

VIEW	BEST FOR
List	Filtering and bulk changes (select rows, change status or person at once).
Kanban	Dragging work from Open → In progress → Review → Done.
Calendar	Seeing deadlines by date.
Gantt / Sprint	Planning the month and staff load.

Auto-create makes all of a month's statutory tasks (GST, TDS...) for every client in one go.

07 · PEOPLE YOU SERVE

Clients

Everything about a client on one page: details, tasks, documents, bills, messages.

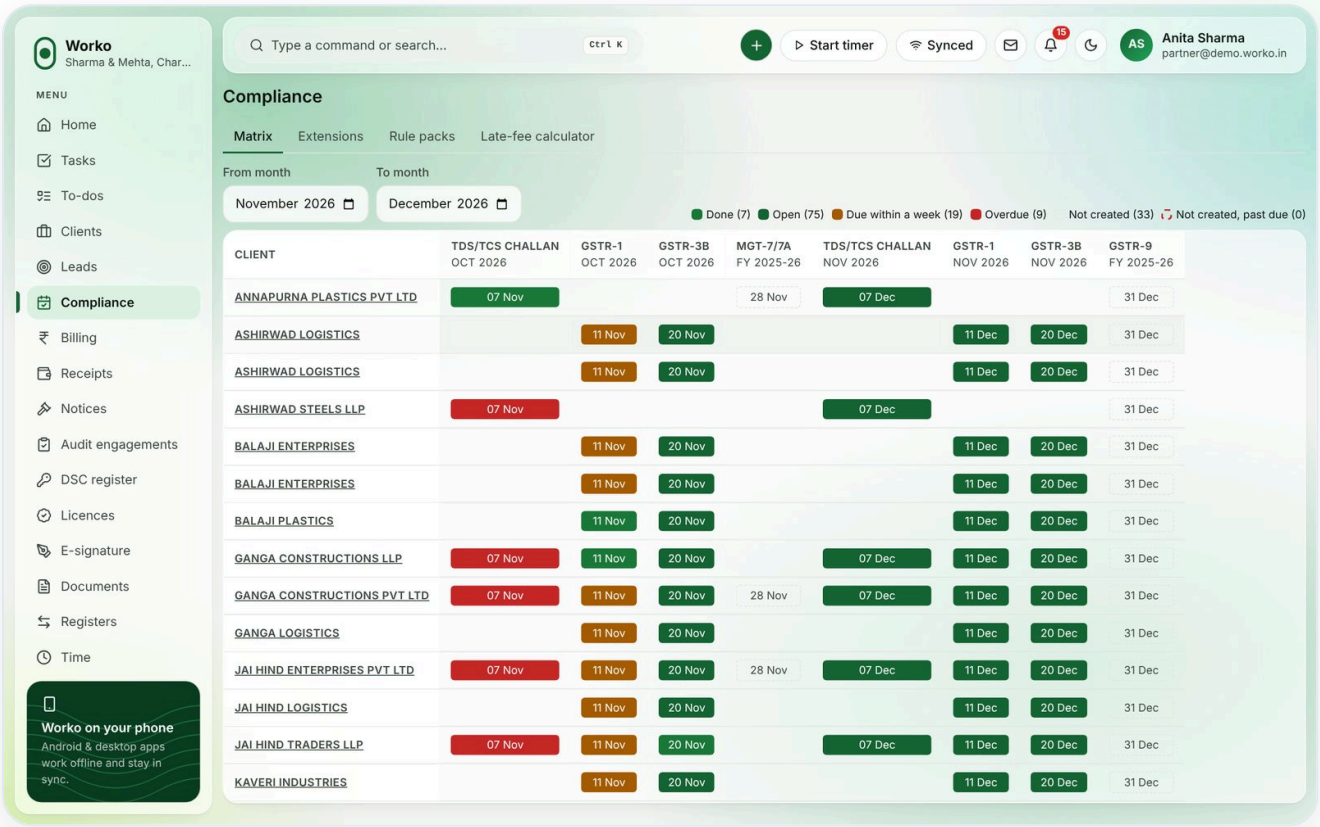

1. Click **New client**. Type the name and PAN — Worko checks the format for you.
2. Add GSTINs and registrations. Pick the services you provide.
3. Open the client to see the full 360° view.

Many clients? Use **Import data** on the dashboard to load a spreadsheet.

08 · DEADLINES

Compliance

A grid of every client against every return. Red means late.

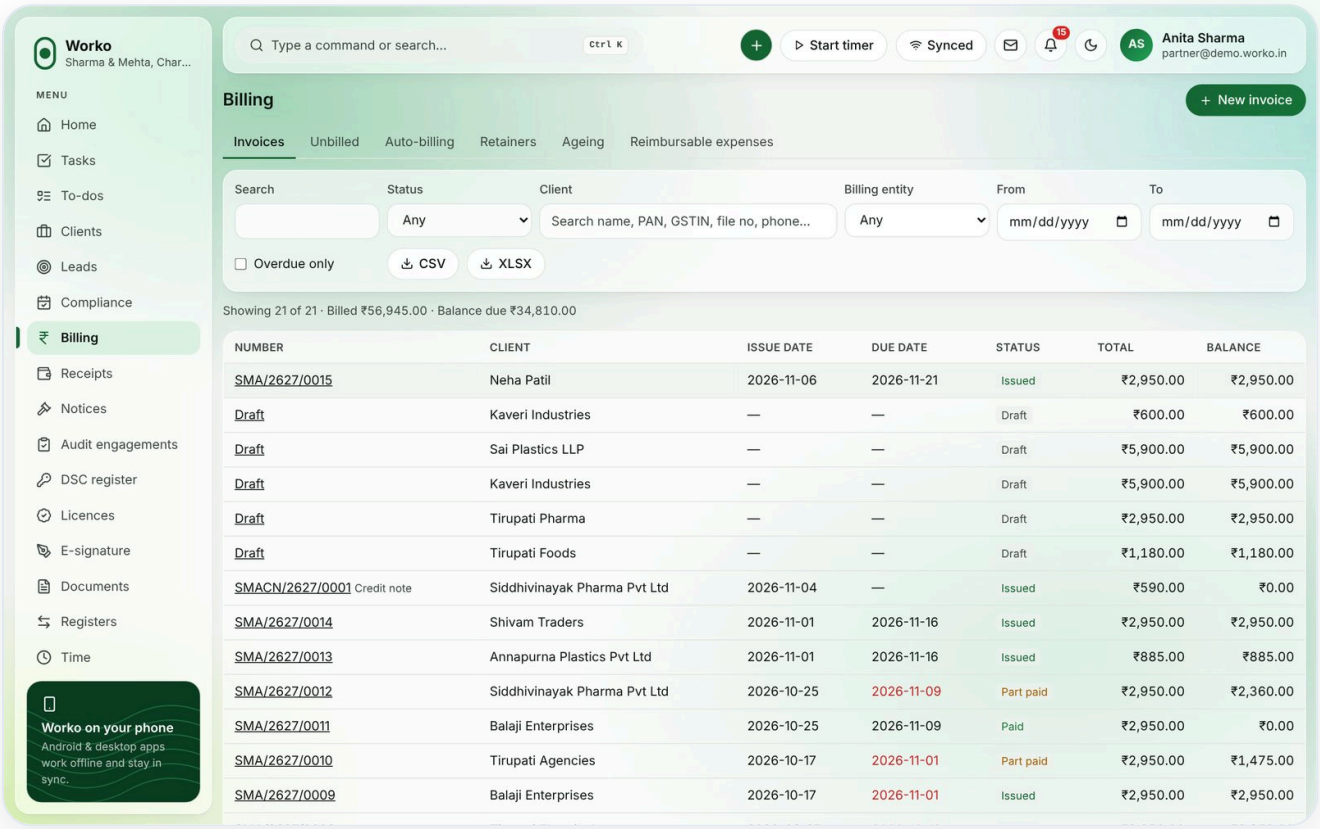

1. Pick the month and the return type.
2. Each cell shows status. Click a cell to open the task.
3. When the government extends a date, add it under **Extensions** — all tasks update.

09 · GET PAID

Billing

GST-ready invoices, receipts and follow-ups.

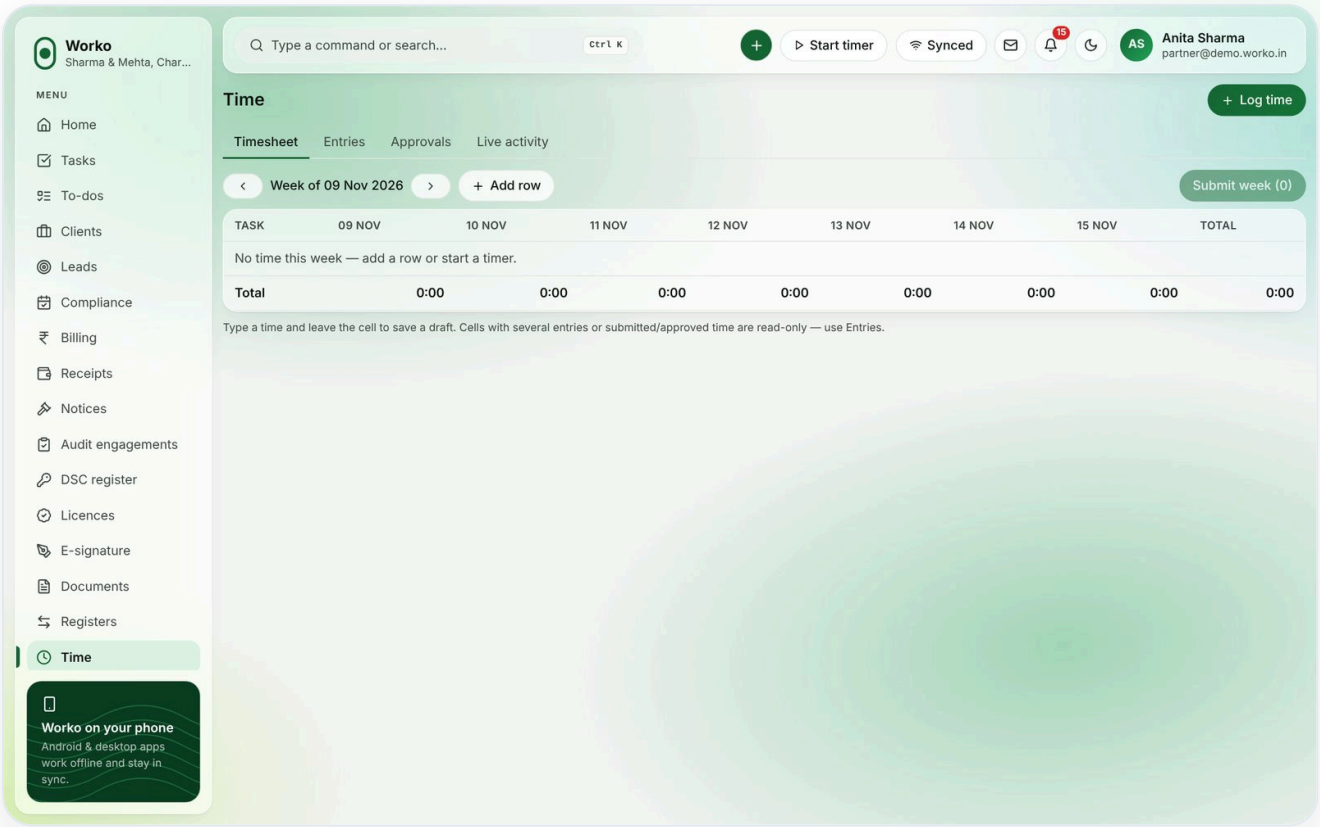

1. Click **New invoice**, pick the client and add lines. GST splits itself (CGST/SGST or IGST).
2. **Issue** it to give it a number. Download the PDF or send it.
3. Record money under **Receipts** — TDS is handled.
4. See who owes what in **Ageing**. Export to Tally anytime.

> **Unbilled** lists finished work that has no invoice yet — nothing slips through.

10 · HOURS

Time

Track hours with one click. See profit per job.

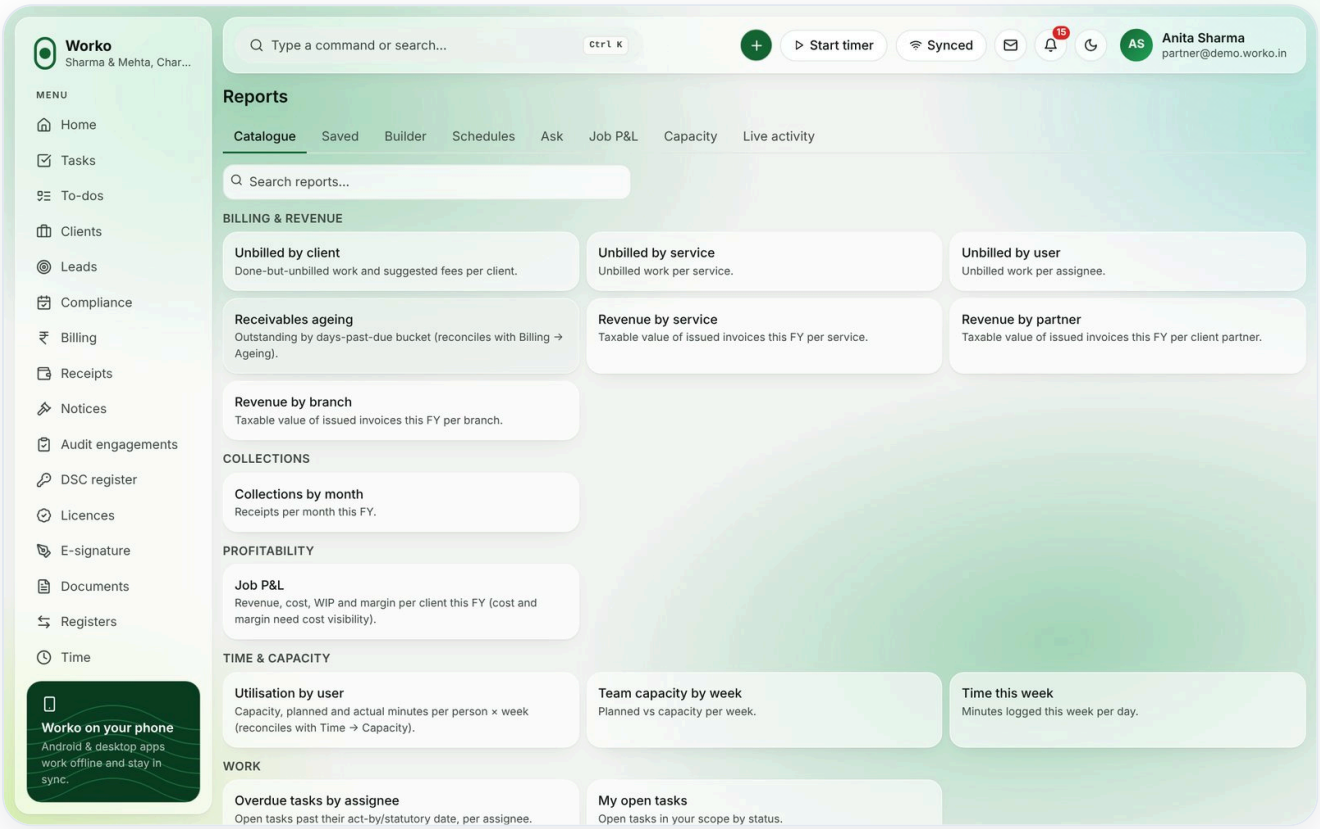

1. Press **Start timer** in the top bar. Pick the task.
2. Press **Stop** when done. It becomes a draft entry.
3. Submit your week. Your manager approves it.

Forgot to start the timer? Add the hours by hand on the Timesheet tab.

11 · INSIGHT

Reports

Ready-made reports, your own reports, and scheduled emails.

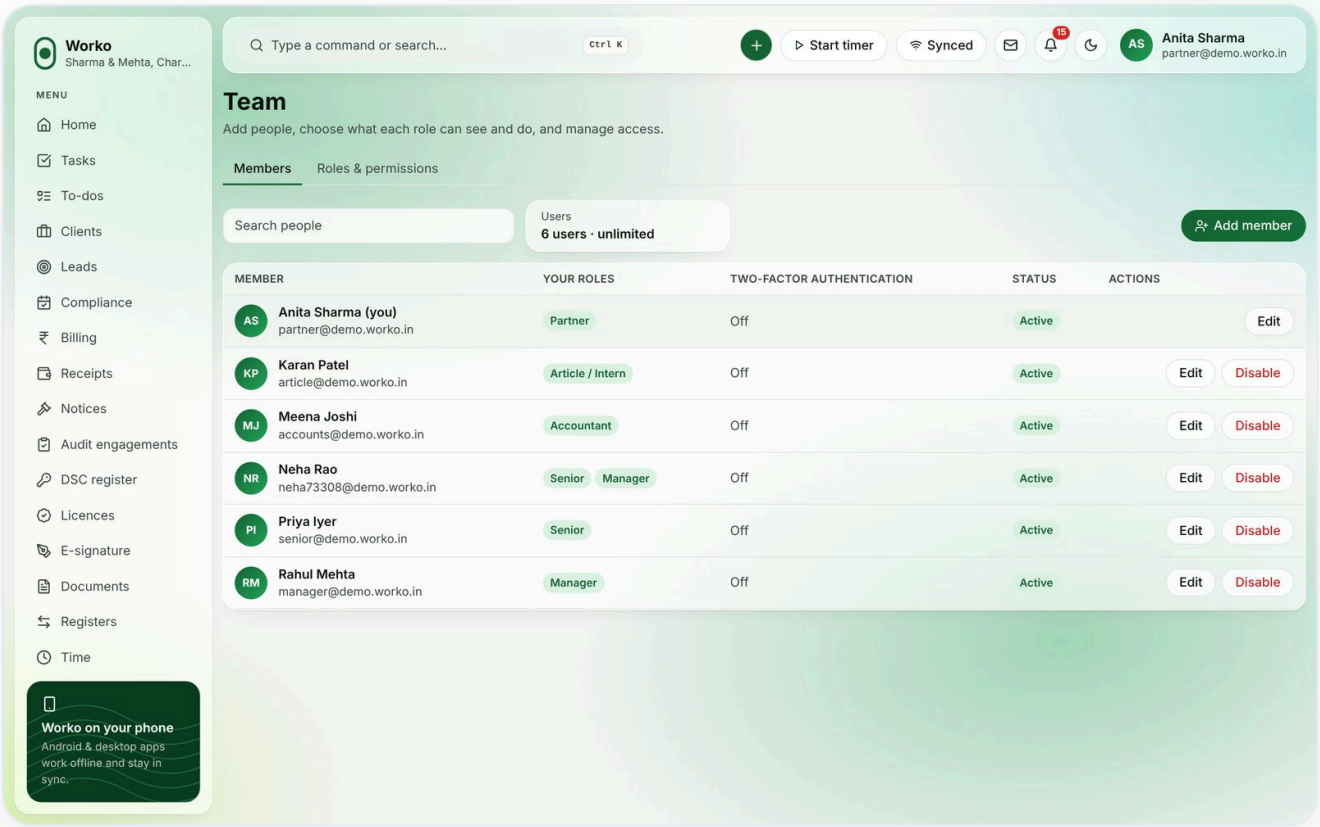

1. Open a report from the **Catalogue**.
2. Change filters and columns. Click any number to see the rows behind it.
3. Export to CSV, Excel or PDF — or set it up under **Schedules** to arrive every week.

12 · FOR ADMINS

Team & roles

Add people and decide exactly what each role can see and do.

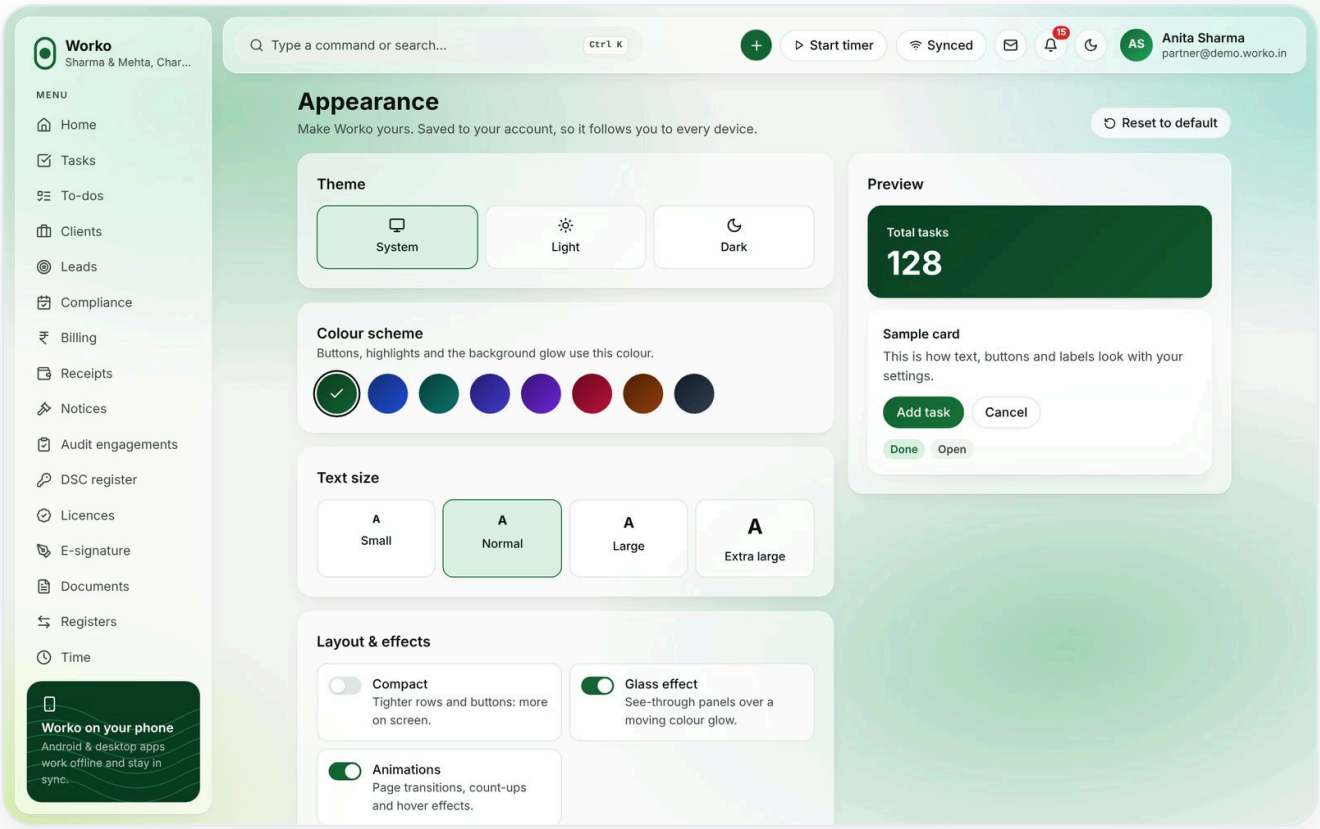

1. Go to **Team** → **Add member**. Enter the name, email and role.
2. Open **Roles & permissions** to tick what each role can view, create, edit or delete.
3. Turn a person off any time when they leave.

Seat limit: your plan sets how many users you can have. The platform admin can raise it.

13 · PERSONAL

Make it yours

Your settings follow you to every device.

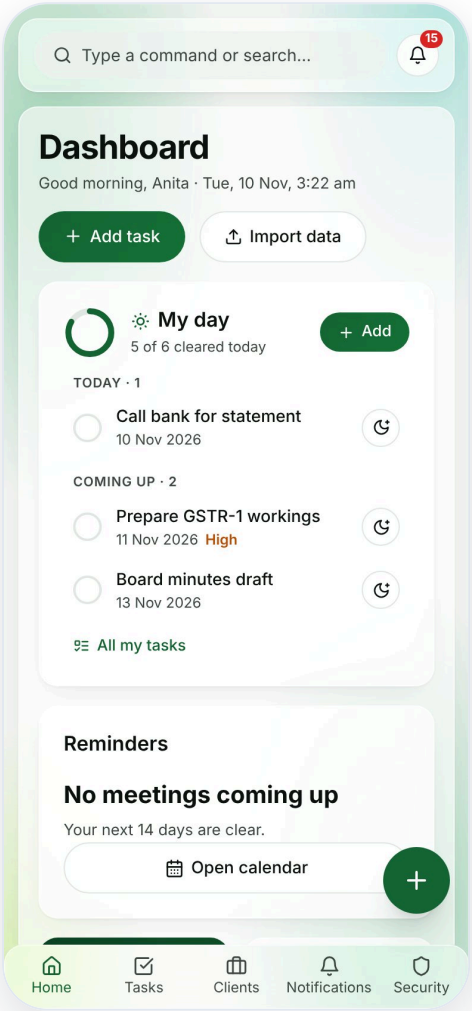

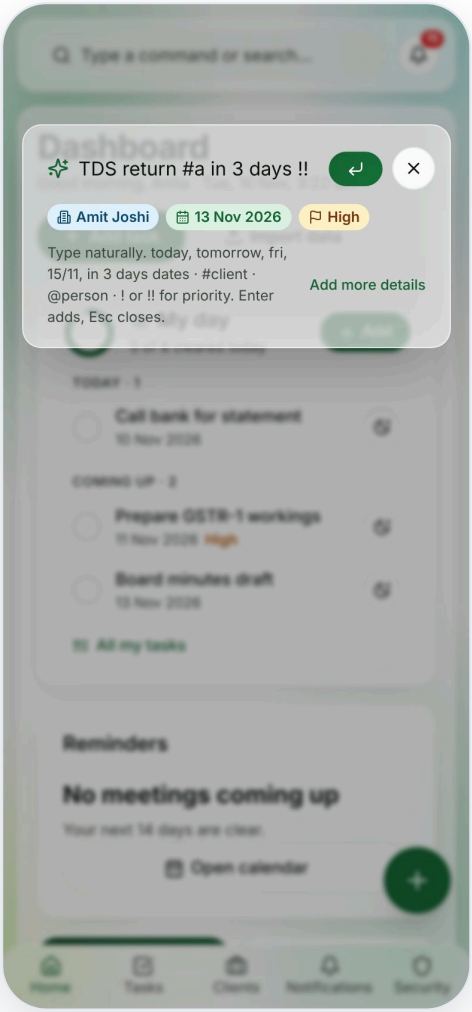

SETTING	CHOICES
Theme	System, light or dark.
Accent colour	8 colours, all easy to read.
Text size	Small to extra large.
Layout	Compact rows, glass effect, animations on or off.
Modules	Hide menu items you never use.

14 · MOBILE

On your phone

The Android app works without internet and syncs when you're back online.

1. Tap the round green **+** to quick-add a task.
2. Use **My day** on Home: tick to finish, moon for tomorrow.
3. The bottom bar has Home, Tasks, Clients, Inbox and More.
4. Upload documents and capture signatures right from the phone.

No signal? Keep working. A small strip shows how many changes are waiting to sync.

15 · CHEAT SHEET

Shortcuts & help

KEYS	DOES
N	Quick add a task
Ctrl + K	Search everything
G then H / T / C / D	Go to Home / Tasks / Clients / Documents
Enter · Esc	Save · close

Something not right?

PROBLEM	TRY THIS
“Details did not match”	Check the Firm ID spelling. Ask your admin to reset your password.
Can't see a client or menu item	Your role may not include it. Ask your admin, or check **Appearance → Modules**.
A module says “not available”	It needs an outside service (payments, WhatsApp, e-sign, AI). Your admin can connect it.
Changes not showing on another device	Check the sync badge in the top bar; tap it to sync now.
Can't mark a task done	Finish the required checklist items, or the UDIN for audit tasks.

Still stuck? Your firm admin can see an activity log of every change and help you quickly.
